

TIMING EQUIPMENT MANAGER (DOI Trial Position)

Prior to trial or event:

- Store all timing equipment cases in a relatively cool location in garage or home between uses.
 - 10 Equipment cases – 6' long by 3' wide by 2' tall
- Buy 48 AAA batteries for lighting towers and eight 9-volt batteries (only when needed) for comptroller, towers and headsets prior to start of each trial. Note: headsets do not always work consistently. Check prior to trial.
- Charge 2 small rechargeable batteries.

During trial or event:

- Locate a 2' X 3' space at the trial site to set-up, load, and charge batteries during the trial.
- Load battery packs and test lighting towers, comptrollers, and headsets (if being used) daily during trial. (Note: Battery packs load in towers only one way!)
- Charge all rechargeable batteries each night.
- Set up timing equipment each morning and secure nightly in trailer/truck.
- At the end of the show remove AAA and 9 volt batteries (if any were used) and give away. They are replaced prior to every show.
- Be available to assist with timing equipment issues throughout the entire trial.

Important equipment notes:

- Equipment is color coded. Do NOT mix colors! Ring 1 is purple and Ring 2 is red.
- Do not leave batteries in equipment following the trial since they will leak causing major damage!

Compensation:

- One dog/day free entry, minus fees paid to USDAA or AKC
